INTERNATIONAL INC.

2018

**Worldwide Industrial /
Commercial Construction
Schedule of Rates Yearbook**

9TH EDITION

VII ABOUT THE FIRM

0

1 DIVISION 0

Introduction and Calibration Factors: includes the following:
 Location (Calibration) Factors - International values compared to Washington D.C. (Base of 1.00). Calibrations in this application are used to adjust the unit prices / schedule of rates depicted in the following Divisions 1 – 17.
 188 # International Cities Location / Calibration Factors.
 General Conversion Values - Imperial to Metric Units.
 Import Duties General Sales Tax / Value. Added Tax / Consumption Tax.
 284 # USA Location (Calibration) Factors.
 Detailed Design / Engineering / Architectural and CM Fees 51 # Facility Types.
 Union Labor Costs.
 USA and Canada State & Province Sales Tax / GST.
 Inflation Cost Indexes.

00

27 DIVISION 00

Cost Models / Cost Benchmarks (17 Number) includes cost and quantity data on the following:
 Power Station Cost Model.
 Crude Oil Distillation Complex.
 High Rise Apartment Building Cost Model.
 Waste Water Treatment Cost Model.
 EPCM Home Office Billing Rate Sheet.
 Consumer Products Facility.
 Steel Production Cost Model.
 Beverage Production Facility Cost Model.
 Petro – Chemical Cost Model.
 78 # Engineering / Construction Cost Benchmarks.
 Class A Office Building
 UK Pharmaceutical Facility
 Clean Warehouse
 Regional Airport
 Shopping Mall

01

61

DIVISION 01

General Requirements / General Conditions / Preliminaries:

includes cost data on the following:

Rules of thumb

Insurance Costs

Protection of Completed Work

Scaffolding

Temporary Utilities, Structures & Fences

Permits

Testing / Inspection

Surveys

Bonds

Site Staff / Field Personnel

Construction Equipment Costs / Rental

Temporary Construction Items

02

83

DIVISION 02

Site Construction: includes schedule of rates for:

Demolition (including asbestos)

Excavation

Rock removal

Hardcore / Stone

Shoring

Planking & Strutting / Sheet Piling

Foundation Piling

Utilities

Miscellaneous Site Improvements

Paving

Concrete Curbing

Fencing

Site Lighting

Marine Work

Underground Storage Tanks

03

103

DIVISION 03

Concrete Work: includes schedule of rates for:

Concrete
Formwork
Reinforcement
Precast Concrete
Grouting

04

129

DIVISION 04

Masonry: includes schedule of rates for:

Brickwork
Masonry
Refractory

05

139

DIVISION 05

Metals: includes schedule of rates for:

Structural Steel
Metal Joists
Metal Framing
Miscellaneous Iron
Metal Decking

06

157

DIVISION 06

Wood and Plastics: includes schedule of rates for:

Rough Carpentry
Finish Carpentry
Carpentry Specialties

07

167

DIVISION 07

Thermal and Moisture Protection: includes schedule of rates for:
Damp proofing and Waterproofing
Thermal Protection
Roofing Systems
Caulking & Sealants

08

181

DIVISION 08

Doors and Windows: includes schedule of rates for:
Wood and Plastic Doors
Metal Doors and Frames
Windows
Glazing / Glazed Curtain Walls
Hardware

09

189

DIVISION 09

Finishes: includes schedule of rates for:
Plaster and Gypsum Board
Tile
Terrazzo
Ceilings
Flooring
Wall Finishes
Acoustical Treatment
Painting and Coatings

10

201

DIVISION 10

Specialties: includes schedule of rates for:
Visual Display Boards
Compartments and Cubicles
Louvers and Vents
Wall and Corner Guards
Miscellaneous Facility Specialties

11

209

DIVISION 11

Equipment: includes schedule of rates for:
Maintenance Equipment
Loading Dock Equipment
Industrial and Process Equipment
Laboratory Equipment
Material Handling Equipment

12

221

DIVISION 12

Furnishings: includes schedule of rates for:
Furniture
Manufactured Casework

13

225

DIVISION 13

Special Construction: includes schedule of rates for:
Pre-Engineered Buildings & Structures
Radiation Protection
Storage Tanks
Security Access and Surveillance

14

233

DIVISION 14

Conveying Systems: includes schedule of rates for:
Elevators
Escalators and Moving Walks
Hoists and Cranes

15

241

DIVISION 15

Mechanical Work: includes schedule of rates for:
Building Services Piping
Plumbing Fixtures
Process Piping
Fire Protection Piping
Heating, Ventilating & Air Conditioning Equipment
Ductwork
Insulation

16

311

DIVISION 16

Electrical Work: includes schedule of rates for:
Electrical Equipment / Transformers
Cable / Control wire
Conduit
Cable tray
Communications
Instrumentation and Controls

17

343

DIVISION 17

Process Equipment / Major Equipment: includes schedule of rates for:
Agitators
Air Handlers
Boilers
Chillers
Compressors
Condensers
Conveyors
Cooling Towers
Ductwork
Heat Exchangers
Pumps
Tanks

Compass International Consultants Inc. was founded in 1992 (C.I.C.I) and is a provider of construction estimating services, international construction cost data, location factors, training seminars, value engineering, estimating support and conceptual construction economic cost data. Compass International is backed by an excellent staff of experienced Cost Engineers, Cost Estimators, Civil / Mechanical / Chemical Engineers and Economists.

ACKNOWLEDGEMENTS

This data source is the result of more than twenty years research and data collection. The information contained in this data source was collected from more than 60 + completed CAPEX projects (Refinery, Chemical and Manufacturing facilities) located in North America, the UK, Mainland Europe, Asia, Africa and South America valued between \$0.30 million to over \$3 billion. The data is based on Compass International's cost library, augmented with latest cost and labor data from International Development Banks and Agencies, European Union Commission Reports, various Country National Libraries and Bibliothèques from around the world, various Government Information Agencies, Global Quasi-Governance Organizations, an assortment of Government Trade Promotion Departments / Labor Departments, numerous trade magazines, hourly and annual salary rates from US / Overseas labor trade unions, professional society articles, an assortment of newspaper / magazine articles, various international almanacs / directories / tables / reference books, internet data and various cost – construction related publications. The cost models and tables have also been augmented by a number of personal estimating libraries (that in most cases is very recent), this information has been audited, expanded upon, modified and calibrated and refined to today's construction methods and installation applications. We would like to express our sincere thanks to the many engineers, contractors, vendors and other individuals (friends and colleagues) too many to mention who have given freely of their advice, input, time and knowledge so that this data source could be produced for the benefit of individuals that have an interest in this subject matter. We welcome any comments or data that could be used in future updates to make this database more complete and accurate.

Introduction and Calibration factors

This publication, the 2018 Worldwide Industrial / Commercial Construction Schedule of Rates Yearbook is conceivably the most authoritative and up to date estimating tool specific to the topic of Industrial and Commercial unit price (schedule of rates) estimating. The main benefits of this publication are that it is easily understood and it can be used immediately to compile accurate detailed or semi-detailed construction cost estimates. Note the Term: Construction Schedule of Rates is a term widely used in Europe and the rest of the world, in North America this methodology or approach is usually referred to as Unit Price Estimating, both these terms are interchangeable when utilizing this publication.

The following Divisions 1 - 17 contain U.S. unit costs for materials, labor (union application) and construction equipment for construction work associated with industrial and commercial construction work applicable for 2018. This publication answers the questions and issues that are needed in order to produce an accurate domestic or international cost estimate. This reference guide is appropriate for construction professionals who are familiar or who are possibly new to the topic of detailed unit price estimating (schedule of rates estimating). This method can be best described in the following manner - The total construction project (the construction effort or work items) is broken down into smaller distinct work scope items – i.e. a number of single line items (the construction project may consist of 100’s or possibly 1,000’s of these particular line items). A

This publication answers the questions and issues that are needed in order to produce an accurate domestic or international cost estimate.

“unit price cost” (schedule of rates) is determined for each scope item, i.e. line item, the appropriate unit price cost is selected from this publication. The unit price is then multiplied by the “take-off quantity,” i.e. the actual number of doors or windows needed in the facility, the cubic yards of concrete or the length of pipe required; these quantities are more often than not depicted on the architectural / engineering drawings. They are “taken-off” the architectural / general arrangement drawings by counting each door or by measuring the footage of pipe depicted on the drawings (think of the take-off list as a shopping list of items that will need to be purchased or fabricated to complete the construction work depicted on the drawings and further described in the specifications), it is many times further described in (the scope of work statement). This action then establishes the construction cost for each work item (line item). All of the line item costs are then summed up to obtain the total installed cost (TIC) for the project being reviewed or estimated. To summarize the above statement - the total cost of a building / facility is the summary / collection of the “taken-off” quantities multiplied by the related unit cost price detailed in this publication.

The unit cost method of estimating (schedule of rates) is a “proven” reasonably uncomplicated method of determining final construction costs; nevertheless it is a time consuming effort (there is software available and computerized tools that can significantly speed up this effort), nonetheless the end result is usually accurate, perhaps considered

#	DESCRIPTION	U OF M	\$ LOW	\$ HIGH	REMARKS
CONTINUED					
11	New ramps/ aircraft stands / apron construction 6" deep on 2" deep asphalt / tarmac and 4" deep of reinforced concrete.	SF	15	25	Construction costs include 9" to 12" of excavation, imported engineered fill, 95% compaction of fill and necessary grading, lighting, signs and marking, complete with associated drainage systems. (To determine a square meter value multiply \$ value by 10.76).
12	Scarify and resurfacing (2" asphalt / tarmac)	SF	5	10	(To determine a square meter value multiply \$ value by 10.76).
13	New concrete hard standings 4" thick reinforced concrete on 6" imported stone / hardcore base.	SF	10	15	Construction costs include 6" to 12" of excavation, imported engineered fill, 95% compaction of fill and necessary grading, lighting, signs and marking, complete with associated drainage systems. (To determine a square meter value multiply \$ value by 10.76).
14	Scarify and resurfacing concrete hard standings 4" thick reinforced concrete on 6" imported stone / hardcore base.	SF	5	10	Construction costs include 6" to 12" of excavation, imported engineered fill, 95% compaction of fill and necessary grading, lighting, signs and marking, complete with associated drainage systems. (To determine a square meter value multiply \$ value by 10.76).
15	Demolish and remove 4" thick slab on grade reinforced with mesh	SF	2.75	3.75	(To determine a square meter value multiply \$ value by 10.76).
16	Demolish & remove 6" thick slab on grade reinforced with mesh	SF	3.15	4.15	(To determine a square meter value multiply \$ value by 10.76).
17	Concrete cleaning using sandblasting equipment	SF	2.35	2.85	(To determine a square meter value multiply \$ value by 10.76).
18	Tarmac cleaning using sandblasting equipment	SF	2.15	2.65	(To determine a square meter value multiply \$ value by 10.76).
19	New Terminal Building (2 story building 70,000 SF to 140,000 SF)	SF	190	240	(To determine a square meter value multiply \$ value by 10.76).
20	Revamp Terminal Building Minimal upgrade – New Flooring / Carpet, Painting, Upgrade MEP Systems / New Ceilings & Signage.	SF	25	50	(To determine a square meter value multiply \$ value by 10.76).
21	Revamp Terminal Building Medium upgrade – New Flooring / Carpet, Painting, Upgrade MEP Systems / New Ceilings & Signage.	SF	50	100	(To determine a square meter value multiply \$ value by 10.76).

2018 - Division 2 - Site Construction - Union		Unit	Material	Labor	Const Equip	Total
235	Pressure injected grout (1-1 cement and sand mix) including drilling 20' deep 4" dia casing and subsequent removal)	CY	515.29	308.38	138.25	961.92
236	Underpinning existing foundation (includes excavation, removal of surplus, planking & strutting and hand packing / pumping concrete under existing foundation and generally make good) (Maximum)	CY	556.22	1,269.85	316.28	2,142.35
237	Underpinning existing foundation (includes excavation, removal of surplus, planking & strutting and hand packing / pumping concrete under existing foundation and generally make good) (Minimum)	CY	303.11	544.20	135.54	982.85
238	Pipe thrusting 4" CS dia pipe under road, includes jacking holes and subsequent remediation	LF	29.54	47.93	8.36	85.83
239	Ditto, 6"	LF	36.96	59.95	10.45	107.36
